

LABIAPLASTY

Labiaplasty isn't just about aesthetics

Labiaplasty can improve the appearance of your labia and alleviate pain or discomfort caused by the size or shape of your labia.

You may feel more confident after Labiaplasty

Women who have labiaplasty may enjoy a better intimate life, higher self-esteem, and feel comfortable wearing slim-fitting clothes

Labiaplasty is an outpatient surgery

You can go home the same day as your labiaplasty and should be able to return to your normal routine in 1 to 2 weeks

Different techniques can mean different results

There are a lot of different labiaplasty techniques, and the method used directly impacts your final outcome.
