Vaginal Tightening

Over Time or after childbirth, vaginal tissue can overstretch, CosmeGyn tightens and rebuilds the collagen of the vaginal walls.

Stress Urinary Incontinence (SUI)

SUI is an involuntary leakage of urine, due to a weakened pelvic support structure. CosmeGyn treats the entire area increasing the thickness of the vaginal walls.

Vaginal dryness & Recurrent Infections

Dryness and recurrent vaginal infections are treated through rejuvenation. This improves vaginal lubrication and normalizes vaginal pH and flora, and help eliminate chronic vaginal infections.

Post-Menopause - GSM

GSM can cause the lining of the vagina to become thinner, drier, less elastic and inflamed. CosmeGyn reduces uncomfortable symptoms such as itching, burning and friction and helps improve intimacy.

Post-Delivery Rehabilitation

CosmeGyn rehabilitates the entire vaginal area by strengthening and toning vaginal tissue, and restoring its strength and flexibility.

G-Spot Enhancement

The G Spot Enhancement creates more fullness to the G spot, allowing greater direct stimulation, so you can have a more intense and deeper orgasm.

Non-Surgical - Laser

Labiaplasty isn't just about aesthetics

Labiaplasty can improve the appearance of your labia and alleviate pain or discomfort caused by the size or shape of your labia.

You may feel more confident after Labiaplasty

Women who have labiaplasty may enjoy a better intimate life, higher self-esteem, and feel comfortable wearing slim-fitting clothes

Labiaplasty is an outpatient surgery

You can go home the same day as your labiaplasty and should be able to return to your normal routine in 1 to 2 weeks

Labiaplasty

Lessen the excess skin of labia majora or labia minora by removing the excess fat and tightening or lifting the relaxed skin present there.

Vaginoplasty

A surgical procedure that strengthens your vaginal muscles after giving birth or as part of the aging process. It enhances vaginal sensitivity and improves intimacy.

Surgical - Minimally Invasive
